# Hi, I'm Piper Shields!

MASSAGE THERAPIST & BUSINESS OWNER

My journey in massage therapy started in 2004. After graduating from Educating Hands School of Massage, I soon discovered my natural gift for deep tissue massage which led to getting certified in Neuromuscular Therapy. For the past 18 years I've run a successful massage practice and specialized in pain management.

My clients have always appreciated the quality of work I provided. However, I was left feeling frustrated wanting to achieve better results. I wanted to see them completely pain free. After experiencing Robotic Therapy firsthand, I knew it was my missing link. The robot's design and engineering surpass what human hands are physically capable of achieving. There lies the perfect combo and my secret sauce! Combining knowledge of anatomy with state-of-the-art technology, my new business, Robotic Wellness, was born!

I'm grateful for the opportunity to incorporate this incredible technology and be home to Miami's 1st Robotic Therapy pain management clinic and invite you to come and experience it for yourself.

*Piper*

## WHAT IS ROBOTIC THERAPY

Robotic Therapy (RT) focuses on muscular issues utilizing a robotic arm. This arm is able to administer up to 30 pounds of interval pressure to a specific area of the muscle. A therapist will never be able to exert 30 pounds of precise pressure for 1-2 hours to a specific muscle. It's humanly impossible.

Pain, muscle tension and lack of mobility is caused when muscles are contracted and shortened. This is where RT technology stands out. The robotic arm applies pressure to lengthen muscle fibers back to their proper state. This lengthening allows tension to be taken off the bone structure and nerves, thus greatly increasing mobility and decreasing pain.

At Robotic Wellness we are combining decades of massage therapy, knowledge of muscle anatomy, and hands-on experience addressing chronic muscular issues with the "precision" that only robotic technology can provide.

## Client Testimonials

“ I developed chronic sciatica after years of carpentry work. It got so bad that my foot went numb and I wasn't able to walk barefoot. After receiving just one RT session, the numbness was significantly reduced and I regained strength in my foot again.”

Miguel Velazco

## TREATMENTS OFFERED

- ✓ **ROBOTIC THERAPY:** This treatment consists of using robotic technology to apply pressure with precision to a specific muscle to help elongate the tissue.
- ✓ **THERAPEUTIC MASSAGE:** A traditional hands-on massage. This is a full-body treatment that addresses the client's specific need.
- ✓ **AROMATOUCH TECHNIQUE:** Drop into a state of bliss. This treatment uses eight different essential oils that bring the body back into balance.

## Client Testimonials

“Sprinting down the court during my basketball game left me limping as I strained my calf muscle. Later that day I saw Piper for an RT session and she treated the injury. The next day my calf felt much better, as a result I was 5 days ahead of my normal recovery arc.”

Darrin Hall

## WHO WE WORK WITH

---

At Robotic Wellness our main focus is robotic therapy. This innovative therapeutic approach is technologically advanced. It helps maintain muscular health, improve mobility and athletic performance caused by sports injuries. We work with people of all ages that need help in these areas.

## WHAT YOU CAN EXPECT

---

- Dress in loose comfortable clothes
- Review your medical history
- Take a postural analysis reading
- Start with your treatment
- To feel better. Faster
